Subject: Re Thornton Le Dale Proposed Future Housing Sites

I have just looked at the maps showing the proposed new housing sites. All of them are outside the existing village envelope. I suggest that rather than having sporadic development in the future that a much better planning policy of future development, inside the existing village boundary takes place.

Land west of Hurrell lane would be ideal across and up to the existing allotments. Then there is the land rear of the main car park up to Dog Kennel Lane.

No doubt the land owners submitted their land to make a fast buck. I and other Villagers would say that these proposed sites are detrimental to the village and that sporadic development is not conjusive to the character of the prettiest village in the North Yorkshire Moors National Park. We are in a tourist area and need tourism so the character of the village must be kept.
