To Whom It May Concern

Re: Proposed Developments - 481, 267, 147, Beadlam

Dear Sir/Madam

With regard to the proposed housing development in Beadlam, my husband and I are very concerned of the traffic hazard this would create. The A170 is already a very, very busy thoroughfare and quite frankly to add more traffic would create many problems. We live on High Lane and in the height of Summer we find it very difficult to turn on to the A170 as the traffic is unceasing. It may be a good idea to do a traffic survey before any further action commences.

Furthermore like many of these proposed schemes, have you considered the infrastructure and whether the schools, GP Surgeries etc can tolerate a further influx of people ? Also, as there is very little work around here it would mean that people would have to commute for employment, again causing traffic problems.

All in all we are not happy about this proposed plan and object most strongly.

Yours faithfully

Norma and Michael Ward
