Local Plan Consultation Document

As a resident of West Malton I write to object strongly to the above proposals for development of the sites specified.

Already there are major road safety and congestion issues on the approach roads to Malton down the West Entry, creating tailbacks from central traffic lights past Castle Howard Rd.

This proposal is lunacy with no comprehension of traffic or infrastructure impacts on the West of the town.

Environmental impacts from backlogged traffic, visual disruptions, road safety and noise pollution are already unacceptable and these plans merely exacerbate issues created by an ill informed plan.
