

For the attention of Jill Thompson, Specialist(Place)team,

With regard to site no.109 at Thornton le Dale.I note that this site is classed as having high visual value.

I believe that as the site is screened from the east by a mature shelter belt, having housing on the southern border & the remaining village to the west this will mean that there is no visual value to the site as it cannot be seen from the north.

I would therefore ask that the site is considered for future inclusion in planned development of Thornton le Dale.

My contact telephone no. is

Many thanks

John Fields.
